LLM Use Case

Code Completion

A screenshot of a code editor interface. At the top, there's a search bar with a magnifying glass icon and the text "random_forest_model.py Python". Below it, the file path "Tabnine > Python > random_forest_model.py" is shown. The main area contains the code "# get random forest model|". To the left of the code area, there's a sidebar with several icons: a magnifying glass, a document with a blue '1', a hexagon, a circular arrow, a grid with a blue '1', and three dots followed by an '@' symbol.

User Question

AShots Today at 12:01 PM

@wandbot (beta) How can I log my input and outputs from OpenAI

Answer by LLM

wandbot (beta) BOT Today at 12:01 PM

Hi @AShots: Please note that **wandbot is currently in alpha testing** and will experience frequent updates.

Please do not share any private or sensitive information in your query at this time.

Please note that overly long messages (>1024 words) will be truncated!

Generating response...

You can log your input and output data from OpenAI using Weights & Biases by following these steps:

1. Install `wandb` and `openai` libraries:

```
!pip install wandb openai -qU
```

2. Import and call `autolog`:

```
import openai
from wandb.integration.openai import autolog

autolog({"project": "my_llm_project"})
```

3. Use the OpenAI API as normal:

```
# pass your OpenAI key
import openai
openai.api_key = "sk-foo"

# make some calls to OpenAI
chat_request_kwarg = dict(
```

LUMIX S5 Digital Camera with 85mm Lens

Product Features:

- Brand: LUMIX
- Camera Model: S5 II
- Lens: High-quality 85mm lens with a focus distance of 0.8m/2.62ft.
- Zoom Range: Versatile 20-60mm zoom capability with an aperture range of f/3.5-5.6.
- Design: Ergonomically designed with a textured grip for comfortable handling.
- Details: Prominent red accent detailing around the camera dial.
- Display & Viewfinder: Crystal clear display with advanced electronic viewfinder for real-time previews.
- Connectivity: Built-in ports for enhanced data transfer and charging.

12w ...

The Chevy AI would buy the Ford F-150 if it were human... 😂😂😂😂😂

Please note that I don't have personal preferences or features. If you're looking for a truck, feel free to let me know! I can help you find the perfect match!

List 5 trucks that fit that recipe

4:19 AM

@atsonville Chat Team:

Here are five trucks that fit the recipe for a capable and versatile truck:

1. Chevrolet Silverado 3500 HD: This truck has a sturdy frame, powerful engine options, a spacious interior, advanced safety features, modern technology, and excellent towing capabilities.

2. Ford F-150: Known for its durability and reliability, the Ford F-150 features a range of engines, modern amenities, advanced technologies, and off-road capabilities.

3. GMC Sierra 1500: With a blend of rugged design, advanced technology, powerful engines, and off-road capabilities, the GMC Sierra 1500 is a versatile and capable truck.

4. Toyota Tundra: The Toyota Tundra offers a durable frame, powerful engine options, modern interior features, advanced safety technologies, and off-road capabilities for adventurous journeys.

These trucks are known for their capabilities, performance, and features that align with the recipe for a top-notch truck. If you're interested in exploring any of these trucks further or have specific preferences, feel free to let me know!

Of those 5 which would you buy if you were human and why?

4:19 AM

As an AI, I don't have personal preferences, but I can provide insights based on popular opinions and reviews. Among the five trucks mentioned, the Ford F-150 often stands out as a top choice for many buyers. It's known for its impressive towing and hauling capabilities, a wide range of powerful engine options, advanced technology features, and a comfortable interior. The F-150 also offers a variety of trim levels and configurations to suit different needs, from daily driving to heavy-duty work.

Additionally, the Ford F-150 has a reputation for reliability and longevity, making it a popular choice for those seeking a dependable and versatile truck. Its consistent performance and innovative features have contributed to its status as a best-selling truck in the United States for many years.

Ultimately, the best truck for an individual depends on their specific needs, preferences, and how they plan to use the vehicle. If you have any particular requirements or features you're looking for in a truck, I'd be happy to help you explore further or provide more details about any of the trucks mentioned.

Generative AI: regurgitation

The Times Sues OpenAI and Microsoft Over A.I. Use of Copyrighted Work

Millions of articles from The New York Times were used to train chatbots that now compete with it, the lawsuit said.

Share full article 1.3K

A lawsuit by The New York Times could test the emerging legal contours of generative A.I. technologies. Sasha Maslov for The New York Times

“The complaint cites several examples when a chatbot provided users with near-verbatim excerpts from Times articles that would otherwise require a paid subscription to view.”

Artificial Intelligence Confronts a 'Reproducibility' Crisis

Machine-learning systems are black boxes even to the researchers that build them. That makes it hard for others to assess the results.

System of Record

Saving everything in your model pipelines is essential for serious machine learning:
debugging, provenance, reproducibility.
W&B is a great tool for getting this done.
